Lecture

Treatment Strategies for Invasive Fungal Infections

Speaker :

Prof. Ben de Pauw M.D.

*Professor of Medicine, Departments of Blood Transfusion
and Hematology, University Medical Center,
St Radboud, Nijmegen, The Netherlands*

Chairman :

Dr. Raymond W. H. Yung

*Assistant Medical Superintendent &
Honorary Consultant Microbiologist
Hong Kong Sanatorium & Hospital*

Date: 5 July 2010 (Monday)

Time: 6:30 - 7:00 p.m. (Refreshment)

7:00 - 8:00 p.m. (Lecture)

8:00 - 8:15 p.m. (Q & A)

Venue: Room A, Auditorium, 4/F, Li Shu Pui Block,
Hong Kong Sanatorium & Hospital

Accreditation for CME applied
MLT Board 1 CPD point (code : 08100031)

All interested are welcome

Synopsis

Invasive fungal infection is associated with a poor prognosis but is often detected late due to the limitation of diagnostic methods. This lecture will explore how a better understanding of the pathophysiology in combination with improved radiological as well as serology techniques and increased clinical vigilance allow a timely diagnosis of invasive fungal infection for institution of appropriate anti-fungal therapy.

Buffet will be served after lecture
at the Hospital Canteen on 4/F,
Li Shu Pui Block
