

Instructions for using Eye drops / Eye Ointment

(Fig. 1)

(Fig. 2)

1. Eye drops / ointment are sterile before opening. Please keep them in a cool place after each application. Avoid direct sunlight.
2. Eye drops / ointment should be discarded 1 month after opening, or you should follow the instructions of the manufacturer.
3. Please wash your hands before applying eye drops / ointment.
4. Tilt back your head when applying eye medications.
5. Pull the lower eyelid down gently with the eyes looking up.
 - a. Instill eye drops into lower and medial fornix. (fig.1)
 - b. Squeeze 2-3mm eye ointment and apply it on the lower fornix. (fig.2)
6. After applying medications, close the eye and use clean facial tissue to wipe off any excess medication. Then keep your eyes closed and press inner canthus lightly with your index finger tip for about one minute.
7. Do not touch the eye with the tip of the container when using eye medications.
8. Wait for at least 5 minutes before using another medication.
9. When you need to use eye drops and eye ointment, please apply eye drops first, and then eye ointment after 5 minutes.
10. Vision will be blurred temporarily when eye ointment is used.
11. Close the cap of the container after each application.
