# Introduction to the Centre

Established in 1998, the Plastic & Reconstructive Surgery Centre is one of the full-fledged private hospital-based centres in Hong Kong. It is entirely supported by the Hospital's facilities. All consultations, treatments, laser therapies and surgeries are conducted by a dedicated and experienced team of plastic & reconstructive surgeons within the Centre to offer patients a one-stop service. The Centre also provides 24-hour emergency service at the Hospital to serve patients with facial and burn injuries. At our Centre, all services are offered by plastic & reconstructive Surgeons, while the services of dermatologists or oral & maxillofacial surgeons will be arranged if necessary.

# Facilities

## **Plastic & Reconstructive Surgery Centre ( Outpatient )**

Renovated in October 2005, the Centre (Outpatient) is specially designed to ensure maximum privacy and comfort. The Centre (Outpatient) has an operating room, six consultation rooms and seven separate waiting areas. Consultation, skin treatments and minor skin surgeries are carried out at the Centre (Outpatient). Location : G/F, Li Shu Fan Block.

## **Surgery & Skin Laser Unit**

Renovated in 2006, the Surgery & Skin Laser Unit has two well-equipped operating theatres for general anaesthesia and three advanced laser treatment rooms to perform day surgeries and treatments, ensuring optimal patient care and privacy. Location: 3/F, Central Block

## Equipment & Technology

### **Laser, Light & Radiofrequency For Skin Care & Treatment**

The Centre has over 10 advanced multi-functional laser, Intense Pulsed Light and radiofrequency systems for skin care and treatment, including:

- Gentlelase (long pulsed Alexandrite) Laser for pigment reduction, laser hair removal and skin rejuvenation (without crusting)
- AFFIRM (Nd : YAG laser 1440 nm) Laser System for acne scars, pigmentation and wrinkle reduction
- Intense Pulsed Light for skin renewal and hair removal (Medilux and Galaxy)
- Aesthetic Laser System (Versa Pulse QS1064, QS532)
- Ultrapulse Carbon Dioxide Laser System (Ultrapulse)

- Pulsed Dye Laser System (V-Beam): V-Beam Laser System is mainly for treating vascular lesions, including telangiectasias, rosacea and red veins. Patented Dynamic Cooling Device (DCD) is integrated for quick pain relief and epidermis protection.
- Galaxy System (Aurora: Radiofrequency plus Intense Pulsed Light and Polaris: Radiofrequency plus laser): For the reduction of pigment, vascular lesion; hair removal and treatment of wrinkles and laxity.
- GentleWaves(LED Photomodulation):A non-invasive system that activates new collagen formation and promotes skin cell activity to produce healthy skin.
- Radiofrequency for Skin Tightening (Thermage) : Using radiofrequency to deliver heat deep into the dermis to induce collagen modulation, whereby loose skin of the face, eyelids and abdomen can be tightened without surgery.

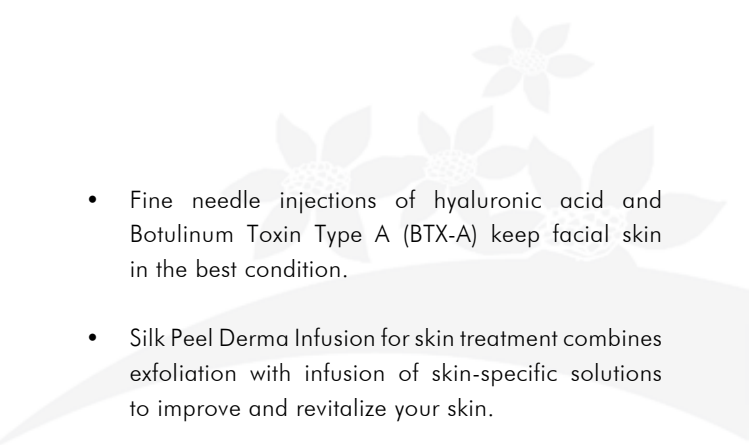

## Plastic & Reconstructive Surgery

With the most advanced tools and techniques, plastic & reconstructive surgeries can be carried out with optimal results:

- Double eyelid surgery by minimally invasive suture approach.
- Video-assisted endoscopic surgery enables brow-lift and face-lift to be done with keyhole incisions.
- New laser systems enable skin surface to be renewed and freshened, e.g. AFFIRM with CAP technology uses microthermal-renewal of collagen for wrinkle reduction, scar improvement and pigment reduction.
- Laser-assisted eyebag surgery shortens the recovery period.

- 
- Fine needle injections of hyaluronic acid and Botulinum Toxin Type A (BTX-A) keep facial skin in the best condition.
  - Silk Peel Derma Infusion for skin treatment combines exfoliation with infusion of skin-specific solutions to improve and revitalize your skin.
  - Fat transplantation enables wrinkles and facial structural defects to be corrected (Coleman Method).
  - Syringe Liposuction System achieves body-reshaping results with minimal trauma.
  - VelaSmooth system for cellulite reduction (F.D.A. approved), which involves infrared light, radiofrequency and endermologic suction technique.
  - Special threads for minimally invasive face and neck lift.
  - Tear-drop-shaped cohesive silicone gel prosthesis for breast augmentation.

The Centre has installed technologically advanced equipment for plastic & reconstructive surgery, including:

- Video-assisted Endoscopic Plastic Surgery Equipment
- Ultrasound-assisted Liposuction System
- Laser-Assisted Hair Transplantation System (Ultracut)
- Fat Transplantation System (Coleman)
- Fiber-Optic Flexible Endoscopy for Head & Neck Examination
- Computerized Data & Image Recording
- UV Photography for Skin Analysis

# Services

Please make an appointment with our doctors for consultation and assessment. Your doctor will give you detailed information about the treatment, including the potential benefits, side effects and possible complications.

## **Skin Treatment & Procedures**

### **✂ Cosmetic Laser Treatment**

- Pigmented Lesions
- Vascular Lesions
- Tattoo Removal
- Hair Removal
- Vitiligo and Psoriasis
- Acne Scars and Other Surface Imperfections

### **✂ Skin Improvement**

- Scar Management
- AHA Chemical Peel
- Microdermabrasion
- Laser Treatment
- Ultrasound Treatment
- Skin Renewal by Injection
- Radiofrequency (Thermage) for Skin Tightening
- Cellulite Reduction (VelaSmooth)

✂ **Botulinum A Toxin Injection**

- Wrinkle Treatment
- Face Reshaping
- Calf Reshaping

✂ **Hyaluronic Acid Injection**

- Wrinkle Treatment
- Face and Nose Contouring

✂ **Skin Moles & Tumour Surgery**

**美容塑身 點夢成真**

Realizing Your  
Dream of Beauty

## **Plastic & Reconstructive Surgery / Cosmetic Surgery**

### **✂ Facial Cosmetic Surgery**

- Double Eyelid Surgery / Drooping Eyelid Surgery
- Eyebag Surgery (Lower Blepharoplasty)
- Other Eye Improvement Surgeries
- Nose and Chin Augmentation
- Other Nose Surgeries
- Lip Contouring
- Gummy Smile
- Brow Lift
- Face Lift / Neck Lift
- Radiofrequency for Skin Tightening (Thermage)
- Fat Transplantation
- Jaw Contouring Surgery
- Otoplasty for Prominent Ears
- Other Ear Surgeries

### **✂ Body Contouring Surgery**

- Abdominal Liposuction
- Abdominoplasty
- Liposuction of Other Body Parts
- Breast Augmentation
- Replacement of Breast Implants
- Breast Lift or Reduction
- Nipple Reconstruction
- Breast Reconstruction
- Endoscopic Sympathectomy for Hyperhidrosis /  
Apocrine Gland Excision for Body Odor

## ✂ Hair Transplantation

### **Other Plastic Surgeries**

#### ✂ Burn and Burn Reconstructive Surgery

- Acute Burn & Burn Scar Therapy

#### ✂ Reconstructive Surgery for Congenital Conditions

- Cleft Lip
- Cleft Palate
- Post-Cleft Lip-Nose Deformities
- Hypospadias
- Microtia

#### ✂ Trauma & Reconstructive Surgery

#### ✂ Cancer Reconstructive Surgery

- Head & Neck Cancer and Reconstructive Surgery
- Breast Cancer Reconstructive Surgery
- Skin Cancer Reconstructive Surgery

Plastic & Reconstructive Surgery Centre  
(In service since 1998)

3/F, Central Block (Surgery & Skin Laser Unit)  
G/F, Li Shu Fan Block (Outpatient)  
2 Village Road, Happy Valley, Hong Kong

Service Hours

Monday to Friday : 9:00 am - 5:00 pm  
Saturday : 9:00 am - 1:00 pm  
(Closed on Sunday and Public Holidays)
